

A reminder of the attendance policy for this course . . .

Laboratory attendance is required. In a laboratory course, there is simply no substitute for “being there.” Much of the benefit of the lab course is derived from your active participation during the scheduled lab meetings. You will learn more by working with your classmates doing the lab than can be assessed by any quiz or exam. In fact, your active participation in the lab is so important that no quiz or exam scores could possibly be high enough to compensate for missing the actual experience of being present in the laboratory. **Therefore, you must complete all of the labs to pass the course.**
